Washington, May 16—The hearing in regard to the classification of lead ore was continued before Assistant becordary Tichelor at the treasury department to-day Argument in support of the present ruling under which lead one mixed with the present ruling under which lead one mixed with the present ruling under which lead one mixed with the present ruling and a support of the present ruling to deep and on the present of the present ruling to the present of colorado and the ore was unade by Senator Wolcott of Colorado, ex Governor Frant of Colorado Mr bhedy of Colorado and R. M. White of New Mexico.

Shedy of Colorano and hard Mexico.

The advocates of protection for American mining intensits introduced testimony from nearly all the leading mining opera ora, smelters and business men of the intermountain country showing that the universal designation and classification of ores was and has been for twenty years past a

iron or containing silver and applied to only that
This did no harm to any protected industry, they and because the from was lost in slag in reduction. They held this ruling was no support to the subsequent rulings admitting lead ors containing silver free of duty, and that the application of a component of thich value rule to auch ores was uncalled for the extension of the principle of the former ruling was not warranted by the wording of it.

They also insisted that the opinion of the judicary committee was for made on a false assumption of fact based on unitroe information as to the commercial designation of such ores and that such insisteding information came from a screeners of the treasure whe was unfriendly to the protection of American Industries.

The closing strument was made by Senstor Wolcox, who said he represented no client in particular, but spoke against the free admixation of

ticular, but spoke against the free admission of foreign lead in the lutterst of the whole people of his state.

A large number of affid wits were submitted to show that ore containing lead was commercially known as lead ore, regardless of the percentage of silver contained in it, and Professor Yale of Yale college, alphmitted a paper sustaining this view from a scientific standard. He argued that compound ores of this kind should be described by the names of both the constituents. White of New Mexico stated that it was not true that the Mexican ore was necessary for the smeiting of the domestic product.

The advocates of the continuance of the present practice of classifying silver oras containing lead, argued that those ores were commercially and technically known as silver oras, and that congress was well aware of the fact when the present tariff was enacted. They held that the question had been already adjudicated and extited, and that our smeiting industries were born and grown up under the present construction of the law.

Judge McCammon in his argument, said that the case was free from questions of fact because the highest known official expert authority designated owes containing allear greater in value than its base metal to be turb fileally and commercially known as a liver ores. This classification was known and noted on he said, when the act of 1853 became a law which did not change the said of the respect to the paying of the said of the fact of the paying of the paying of the said of the respect to the paying of the board of the said and the contract of the paying of the

enator Wolcott said that he appeared for no

question, expressing the hope that the treasury department would give the law the construction that the law makers intended it should have. The hearing closed at this point with the understanding that either ride may fibe additional evidence bearing upon the question of the commercial designation of the ore. Assistant Secretary Takenor says the question will, be thoroughly cons dered by the department, but can not well be deed led for a month yot. y RNT and two cakes of UTILLHA SUAP

In August, 1887, there was a public sale through the board at \$50, but it is stated that there was a private sale as low as \$2.00 per share. This was practically giving the stock away to draw out of the business. Elixyears ago the same stock sold at \$640 to \$500.

Rouds to the amount of \$19,000 were issued about two years ago These were abundantly secured and will be paid in full upon the closing of the business. All current obligations will also be discharged.

This was deserted to the same year in a more substantial manner. The building was located at Black Point in 1869. A very superior article in this line was turned out and attracted general attention, both here and at the East. A pair of California blankets from the Pieneer woolen factory was thought to be a necessary outlay for home comforts. There was an eagure demand for these goods, and large shipmants were made to how York, where they were pronounced superior to anything in that line that had ever been seen in this country.

The Mission Woolen Mills came into existence in 1881 as the result of

layou to 20 to doesn haspan everants and questions were and other goods. In 1857, there were eight woolen mills on this coast—four in Oregon and four in California. The oldest of these was the Williamette Woolen Manneturing Company, established at Esslow in 250.

The four mills in California in 1867 were the Pioneer, Mission and Pacific, at Sen Francisco, and one at Marystylle The We last mained were only started in 1877.

WALLA WALLA AWAKENING THE D

Foundation of the Claim to Distinction as the Onzdsp Epot of the Northwest-The Beet Bugar Industry.

way To Be Built This Summer.

Walla Walla seems to be awakening from her kip Van Winkle sleep of twenty years. The from is atready at the depot for two and one-half miles of street tallyay, and work will begin immediately to grade and lay the track. The line begins at the O. R. & N. dopot and runs through the center of town in the direction of the fair ground, promising to be five or six milus in extent. The question of subsidilying the finit railroad system to the amount of \$400,000 in county bonds of thirty years at 6 per cent, is the main topte of discussion on the stregts, and the prevailing sentiment seems to be in favor of the subsidy. If the people of Walla Walla several years ago had seen people of Walla Walla several years ago had seen the advanteges and necessity of railroads that they see to-day, and done what they appear ready

they see to-day, and done what they appear ready to do now to secure railroad competition, we should have had a road to tide water years say, the freights and fares of which our people might have had a power in some measure to control. Improvements are going on all over the city. There are three new bricks now in process of construction, and a 25,000 school building will be commenced as soon as brick can be obtained. Men seeking quiet, pleasant homes are constantly arriving, and all of them, looking upon the beautiful surroundings of our city, our enchanting mover gardens, our orchards bending upon the beautiful surroundings of our city, our enchanting flower gardens, our orchards bending upon the beautiful surroundings of our city, our enchanting flower gardens, our orchards bending upon the beautiful surroundings of our city, our enchanting flower gardens, our orchards bending upon the beautiful surroundings of bountful harvests, exclaim: Men raike such a control of the control o mi valicy, and were it the size of Lenver Walls Walls would be benefited in proportion, for to our country all must look for fruit and early vegetables.

Aiready this searon many small garden tracis have been sold, but still the greater part of this section is in wheat—owned by large farmers, some of whom own 1000 acres and over. As soon as there is a denuald, these farmers are willing to divide up their lands for new comers at reasonable price. There are perhaps now a hundred men by the valley engaged in gardening, orchards and vineyards—but with reasonable transportation prices a thousand more could find a ready market for all that could be raised—and now is a good time to locate.

odered \$20,000 for his plant, and his revenue from his improvements amounts to several thousand dollars per year. Mr. John Tohnney five years ago, bought thirty agrees of land three miles from the city, and agreed to pay \$50 per agree. He planted it in times, berries and fruit trees and garden. He is now making \$2000 pear year for his labor, and can sell the place for \$10,000. maxing \$2.00 pear year for his labor, and can sell the place for \$10,000.

This industry can never be overdone when the mines of washington are developed, and other great advancements are made.

A country that has the natural attractions and great agricultural and horticultural advantages of walla walls will not always be passed by by the home-seckers, who are flocking from the East to the great Northwest. Our climate alone should be sufficient to attract a great immigration to this section. This is the California of the Northwest, an allitude of 800 feet above the sea level, a mild, ory isomperature in winter, fine water as the world can produce, beautiful sum mers and a feel that eap produce almost anything grown outside of the torrid zone.

that can produce almost anything grown outside of the torid zone.

Fermit me to say a few words as to beet culture. I see that some of the capitalities of California are investing largely in beet sugar refineries, and are looking named to the best countries for the production of beets; the soil is strongly impregnated with alkall, and beets grow to a great size and are very sweet, and an enterprise of that kind would certainly meet with very great success here.

California strawberries have been in market. trauccess here.

Illioratia strawbearies have been in market, now as our own, larger, brighter, sweeter ites make their appearance, the California prodion takes a back seat.

The programme outlined so far will necessitate an expenditure of from \$10,000 for 12,000, and from the enthusiasm displayed by the citizens it is con-fidently expected that the amount will be forth-coming. The railroad companies have agreed to lastic half-rate excursion tickets from the 2d to the 8th of July inclusive.

The next meeting of the committee will take place on Tuesday evening, Muy 21, at 8 o'clock.

A OARD.

To the Editor of the Orrogonian:

I am a plain man, unused to newspaper controversy, with a record unamirched by any previous accusation, and am therefore pained and homiliated at a sceming attempt to pass judgment upon me in advance even of an indiciment by the grand jury. I am informed that the constitution of this state guarantees me a trial by jury and a full opportunity to be heard, yot while consolous of my portunity to be heard, yot while consolous of my ability to prove my innocence. I feet that my interests are seriously imperiled by adverte newspaper criticism.

At the preliminary examination, under the advice of course, I did not testify, and Mrs. Ross, the prosecutirs, was the only witness for the state. Her statement, which was heard by several repairable persons, was to the effect that they recently; she admitted that she had domanded a cheef of all my property, and that she had told me cheef of all my property, and that she had told me cheef of all my property, and that she had told me cheef of all my property, and that she had told me cheef of all my property, and that she had told me cheef of all my property, and that she had told me cheef of all my property, and that she had told me cheef of all my property, and that she had told me had obtained as the state of the property and the she made upon an imperfect report, believe this and leave the state. As no representative of my arread.

As no representative of my arread my self-the indicate, will be made manifest, and will implicate several persons.

My wife supports me in this hour of servow, and I but ask a suspension of judgment upon the part of the public, until the termination of my cose.

in/the city of Vienna there was a one in the city of Vienna there was a dread of hydrophobia, and orders were given to massacre all the dogs which were found unclaimed or uncollared in the city or suburbs. Men were employed for this purpose, and they generally carried a short stick, which they flung at the poor proscribed animal with such certain alm as either to kill, or maim it mortally, at one blow.

saite, which they flung at the poor proscribed animal with such certain aim as either to kill, or maim it mortally, at one blow.

It happened one day that, close to she edge of the river, near the Ferdinand's-Bracke, one of these men flung his stick at a wretched dog, but with such had aim that it fell into the river. The noor animal, following his instinct, or his teaching, immediately plunged in, redeemed the stick, and laid it at the feet of its owner, who, snatching it up, dashed out the creature's brains.

Which was the brute?

We may surmise what the Athentans would have done to such a man from the fact that they barished the judge of the Arcopagus, because he flung away the bird which sought shelter in his boson.

There are men in whom is De spark of gratitude or generosity. There are others who appreciate benefits received and are happy in making grateful acknowledgement.

Rev. J. W. Asheman, one of the most eloquent divines of Detroit, Mich., writes March 3, 1883: "In 1884 I visited Chalham, Ont., to lecture and preach. I was in agonizing pain (the result of kidney disorders), and unable to dine with my host. I explained to Judge Woods what was the matter. He saked me if I was too prejudleed by my medical education to try Warner's Safe Care, adding: "Although I have never tried it, I can take you to a gentleman whom it has helped wonderfully."

"I used twonly-five bottles of Warner's Safe Cure and was in better health than for twenty-five years. I have everything to lose and nothing to gain by making this statement, save the approval of a good conscience."

There are tens of thousands of people in this country who have gained the approval of a good conscience in a like manner, and are not too bigoted to do good.

The new Mays Yard.

The commission appointed by the fiftieth congress to choose a site for a new may yard on the Pacific coast, somewhere north of the 42d parallel of intitude, on the shores of Oregon or of Washington or Alaska, have not yet made their full report, but it is known that the site agreed upon is on Paget Sound, just opposite the town of Seattle. The reasons for selecting this part spear to have been stready given, unofficially, to the Washington correspondent of the New York Sus, and we quoted as follows:

In the first place, it is well situated for its primary purpose of furnishing naval accommodations in addition to those worlded for the Pacific constitution of the New York Sus, and we go the existing navy worlded for the Pacific constitution is easily accessible and Mare island. terrifying than a calamity of this kind. The horrors of earthquake resemble in audden ness and bew iderment and those of the cy clone may equal but they can scarcely ax ceed it. The mercy that waits upon danger in any of these too familiar types consists in the nuddenness that makes the appalling pense of fear a thing of a few minutes dura tion, since in a very short space of time it sads all for its victims and leaves its sur vivors full of thankfulness. The quality of this atrain of mercy is, however more fully appreciated at a distance than at close range with the overpowering element which combines the menace and the blow so closely that the bewildered senses acareely comprebend the one until they are made to feel the terrible force of the other Ax is usual in such cases the "primal sin if selfishiness gives way before the plea of

### STILL UNWRITTEN

It seems a pity that the remains of Allen Thorndyke Rice, the brilliant young diplomat and politician who died a few weeks ago on the eve of his departure for one of the most important diplomatic ports of Europe could not have been en tombed without reference to the deadly feud between his father and mother that marked the period of his boyhood Yet wich was not the case and as a Yet such was not the case and as a matter of fact the American public morbidly curious in such matters has read with more eagerness the details of his romantic life in chi'dhood than those of the earnest brillian work of a manhood richiy endowed by na ture and embellished by calture. It has be come known to thousands of persons, what was before his death known to but a few that irreconcilable differences arose between his parents in his comparative infancy which the courts assumed to settle by giving the boy to the custody of the father mother quick witted tender hearted and smarting under a sense of injustice which was the common lot of women situ ateu as she was a quarter or a third of a cer tury ago possessed herself of the child by kidi ping and that he marqueraded in the attire or a bittle gif for years. His father determined and possessed of ample means spent \$50 000 in the vain endeavor to retake him his detectives being constantly biffied by the vigilant and equally determined mather and it was not until he grew to be muther and it was not until he grew to be quite clad that a reconciliation was effected between himself and his father

but after all, though every available point in the so-called romance of his boyhood have been industriously worked up for the public, after imagination has lent its powers and fiction added its vagaries to the history of these events how little of the real human arxiety and suffering, of oassign and approor ness events now little of the real human anxiety and sufficing, of passion and appre-bension of love and fear that formed the wars and worf of those troubled years have been presented? How little is it possible to present? The barest outlines of such a present? The barest outlines of such a struggle involving as it did at once the ten derest and m at vinductive feelings of which the human heart is capable are alone possible. ## PRESBYTEI I AN CONFESSION OF I 411H

Presbytemanism in its dogmas of pre-Preshyterianism in its dogmas of pre-destination and election, was once the un-yielding expression of a theology which the world found impossible to reconcile with the principle of man's free will. That the ology was in fact a juggle of metaphysics, belonging to a time when men supposed that they could solve the deepest mysteries of the providence of tool and of the life of man with formularies of speech and logic and as the authors of this doctring believed their as the authors of this doctrine belowed their logic to be infailible they did not heretate to follow it to thourd conclusions and then to declare those conclusions to be mysterious deciare those conclusions to be mysterious truths which must no received by faith and questioned not. But free will could not be bound in these chains, man was too conscious of his own dignity his own freedom his own responsibility. There were fierce contests in the history of Presbyterinnism over these dogmas rivaling in acrimony and bittercess the controversies between the Protestant churches and that of Rome and Protestant churches and that of Rome and great day also of seets was one of its consequences an arism has had its citadel in the Prespyter an church but latterly even that church has not strongly asserted nor contentiously maintained the old dogmas. contentionaly maintained the old dogmas. igic There are plenty of Presbyterians now who are conscious of the absurding of the We t minater confession of faith and think it should be subjected to revision. A number pf presbyterms therefore submitted to the general assembly that sat recent var here.
York a memorial for modification of the ar ticles and the general assembly in response to this petition has opened the door to un restricted discussion. Following is the text of the principal part of the third chapter, containing the doctrines of which modification was suggested

I God from all eserbity did, by the most wise and holy counsels of his own will, freely and un changeably ordain whatsoeyer comes to pass yet so as thereby norther is dod the author of sin, nor is violence offered to the will of the creatures, nor is the liberty or contingency of second causes gaken away, but rather established.

If Atthough field throws whether are all the street of the second causes.

II. Although God knows whatsoever may or can posse to pass upon all supposed conditions, yet

and to the praise of His glorious justice.

These doctrines long since passed into desuctude, and therefore might as well pass out of the book of faith in which they are written. And better for in this day nien are not to be fed to salv ition through dogmas that produce intellectual revolt, and moreover it is not through these dogm is but in the technique them that the Preshyterian church is and long his been great and useful and strong.

Burnes who was placarded on every fence and barn door in the land a dozen or more very ago either neglected his bitters and died or patronized them and died a short time ago. At all events, he died, and now comes a concly and long concealed voting woman with a dower claim of \$250,000 against his estate She ought to get it. Such men as he are slow to learn the ferson of decency and open responsibility in their relations with women and it matters little relations with women and it matters little which one of the more or less numerous women who shared their social delinquencies in life gets a dower right in their accumulations after death so long as children of a faithful virtuous first wife" are not defrauded thereby. The young woman who ambaicades near the estate of the millionaire roue is as much a fixture of modern life as the man himself, and the public is too intelligent to be surprised when, after his death she comes from her concealment, assumes widow's weeds and modestly saks for an allowance that will enable her to maintain her usual stree of inxurious living. The an anowance that will enable her to main-tain her usual style of luxurious hying. The Sharon case is now about done with; the half dozen wives of Singor have been dis-poved of and his numerous progeny properly and equitably endowed, the Blythe heirs have dropped out of sight, and the case of Plantation Briters Barnes may as well come up next.

A woman was granted a divorce from her A woman was granted a divorce from her husband in this city a few days ago on a charge of habitual drunkenness and failure to provide The custody of the nine children of the marriage was also awarded to her. The herotsm of such a woman is undoubted, but her judgment is hardly to be commend-ed such a wife would be a bonanza to a worthless fellow who objects to supporting a large family but such a mother, notwith-standing her implied willingness to look after her off pring has proved a doubtful blessing since it took horaltogether too long to find out that the father of her nine children was not fit to be their custodian. It is a case of the exercise of too much or too little patience. She should either not have submitted so long to the burdens of uncon genial matrimony or have borne them to the end. Habitual drunkenuess and failure to provide are among regords for a diversity. provide are ample grounds for a divorce certainly both in law and in fact, but they are qualities that do not spring up in a night. For the take of posterity and community in terests generally the remedy in such a case should be applied much earlier

Complaint is made that the tramp nuisance is growing intolerable along the rail-roads up the Willamette valley. A recont involce noted for their excessive impu-dence seem to have stolen their way into the state watching a chance to board the trains at almost every station. Every cluzen has a duty to perform in reference to these swatgering unlempt, mal odorous 'sons of lesure'. Work should be exacted of them in advance for every mouthful of food furnished if they are fed at all and they should when their hunger has been appeased be peremptorily ordered to move on There is little trouble to be apprehended from them when men are at home but in the farming districts women are often alone with little children and are practically at the mercy of the impudent vagabonds who demand food of them. This is the most serious phase of the question at present, and it is one that calls for the exercise of more than ordinary valuance on the part of persons thus situated.

The total rainful from July 1 1238 to June 1 1889 as shown by the weather bureau of this city was 31 24 inches, a delicioney of 17 30 inches in a period of eleven months And yet the next ignry spell that comes the perennal growler will comment dolefully upon the alleged fact that it rains all the time in Oregon or vary his cheerful state ment by the ancient withclam that fixes the rainy season here at thirteen months in the year. As long, however as abundant crops inxuriant vegetation and general free dom from cyclones and blizzards are countdoin from cyclones and bluzzards are counted into the blessings of Oregon, the chronic growler s estimate of the climate and the doleful prognosticator s prediction of failure of crops, will amount to little With the generous record of the past for reference the people are willing to trust the climate of Or egon to do about the right thing. If the al-lowance of rain is not uniform from year to year the general average is satisfactory

Some people have too little sense Here is the Baker City Persille abusing The OB EGONIAN because in an article about Portland that recently appeared in its columns there was nothing about the Baker county mines The Baker editor hadn't ser enough to see that in the first place that article was an advertisement, written and paid for as such, and in the next place that an article on Portland couldn't be expected to take in the whole outside world. Time and again the mines of Baker county have been fully written up in The Orgontan and will be written up in its columns many times more but perhaps they may not be mentioned in an advertising write up de voted to i ortland

The state grange which closed its annual ses ion at Salem I ridge plassed a resolution recommending a charge in the law requirms a majority of the regens of the State Agnetitural College to be practical firmers. Another resolution, but the effect there should be one or more women-or the board was passed. It is ordern to all that if the state is very to get a new results. state is ever to get any returns in practical farmers or tarming from the large sums that it has spert in keeping the agricultural college going, there must be some change in management and methods An application of the grange's idea as above noted might

Oliver Johnson the last of the coterio of anti-slavery santators, who founded, with William Lloyd Garrison, the first anti-slavery secuety, has written for the June number of The Compophism an article upon Anti-Slavery Societies," which is the most interesting chapter thus far contributed to the series of anti-slavery articles entitled "The Great Agitation" now appearing in that magazine Oliver Johnson's portrait is one of a number of sugravings litustrating the article

A copy of the Masarin bible which was the first printed by Gutenberg with movable motal types and should more properly be culled the Gutenberg bable formerly in the library of Lord Hopetoun was recently sold for the large sum of £2000. As every one knows, it is a Lakin bible printed by Gutenberg and Faux about 1450 to 1455, at Mainz This is the fourth copy of this extremely rare and most interesting bible which has been sold within the last fifteen years for prices varying from \$10,000 to \$14000.

In his article on "Slavery in Africa" in the Jime Soyber Frofessor, Henry Drummond prices varying from \$10,000 to \$14 000.

In his article on "Slavery in Africa" in the June Scribner Professor Henry Drummond (the author of Tropical Africa") says. Do not let it be supposed that this horror is over, thit this day of tribulation is at an end This horror and this day are now I its not even abating Slavery is on the increase. Time civilization Christianity are not really touching it. No fact in relation to the slave trade is more appealing than this. The fact

touching it. No fact in relation to the slave trade is more appalling than this. The fact to fit is increase, for a time denied then doubted, has at last been reluctantly admitted even by the government of England."

Lardinal Newman lately celebrated his 88th birthday. His awakening and liberating influence in earlier years promised much for literature which has not been realized I celesiasticism gained what hierature lost Speaking of the influences at work in the Oxford of his vouth Matthew Arnold, in his lecture on Emerson says. There came to us in that old Oxford time a voice (Emerson's) also from this side of the Atlantic, a clean and pure voice which for my can.

\*\* \* brought a train as new and moving and unforgetable as the strain of New man or Carlyle or Goothe.

To the Editor of The Gerrana:

I am a plain man, unused to newspaper controvers, with a record unamerched by any previous accessfully, and an therefore planed and humilist and at a seeming attempt to pass judgment upon me in advance even of an indictment by the grand jury. I am informed that the constitution of tide state granantes me a trial by jury and a full opportunity to be heard, yet while conscious of my ability to prove my innocence. I feel that my interests are seriously imperied by advene newspapers of the preliminary examination, under the advice of counsel, I did not teatly, and Mrs. Ross, the prosecutivity, was the only witness for the state. Her statement, which was heard by several reputable persons, was to the effect that there had been improper relations between us since her man-cringe, the first time six mouths ago, the last time recently: she admitted that she had done improper relations between us since her man-crimeter; she admitted that she had old me limit if a would make no complaint against my; that her mother-locks had told for she was emitted to the property, and that if 15pd made the deed she whold make no complaint against my; that her mother-locks had told for she was emitted to the property, and that if 15pd made the deed she whold not have caused my arrest.

As no representative of The Oragonian was present and comments have been made upon an imperient report, I believe this statement but just to myself. I am the victim of a conspiracy, which will implicate several person as conspiracy, which will implicate several person here or made upon an imperient report, I believe this bourset corrow, and it is the statement and comments and the bourset corrow, and it is that the public, until the termination of my case.

We may surmise what the Athenians would have done to such a man from the fact that they basished the judge of the Arcopagus, recease he flung away the bird which sought shetter in his bosom.

There are men in whom is no spark of gratitude or generosity. There are others who appreciate benefits received and are happy in making grateful acknowledgement.

Rey, J. W. Asheman, one of the most eloquent divines of Detroit, Mich., writes March 3, 1883: "In 1834 I visited Chatham, Ont., to lecture and preach. I was in agonizing pain (the result of kidney disorders), and unable to dine with my bost. I explained to Judge Woods what was the matter. He asked me if I was too prejudiced by my medical education to try Warner's Safe Cure, adding: "Although I have never tried it, I can take you to a gentleman whom it has helped wonderfully.

"I used twenty-five bottles of Warner's Safe Care and was in better health than for twenty-five years. I have ererything to lose and nothing to gain by making this statement, save the approval of a good conscience."

There are tens of thousands of people in this country who have gained the approvat of a good conscience in a like manner, and are not too bigoted to do good.

the reasons for selecting this point appear to have been already given, bandheinly, to the Washington correspondent of the New York Sun, and are quoted as follows:

In the first place, it is well situated for its primary purpose of furnishing naval accommodations in addition to those provided for the Pacific coast by the existing navy yard at Mare island. This latter is easily accessible from points on the Oregon coast, which accordingly will henceforth be additionally provided for by being between two navy yards. On the other hand, the growing Importance of Alaska and the existing importance of the new state of Washington make the present site mane destrable than one further south. Was He a Husband When He Married His Second Wife?

Greatly Surprise the Denessed's Many Old Erlenda.

The application recently made by Mrs. jatherine Scott, widow of the late C. Manchestia, N. H., May 3, 1889.

New Y. Dolph, Bellinger, Maliory & bimon, Portland, Or.—Geatlemen. About three week ago W. H. Clark, et a., of Sahnas Cary, Cal., (a brother-in-law of the late C. C. Scott, of your city.) telegraphed my son. R. Harry Scott, the name of your law firm. I intended witing you at once, but have iteen ill and unable to do so until now. I suppose you have beard from Hon, Henry H. Huse before now, as he told me he wrote you a fortnight ago.

I have placed the affair in his bands. He was formerly of the firm of Briggs & Huse, a leading law firm here, but a now out of the law, and at present holds the position of haurauce commissioner of New Hampshire. He is a neighbor and a warm friend of the family, having known us and also Mr. Scott, Intendedly, for years. He will send you the proofs of cut marriage, our son Harry's birth and my divorce, which was granted use in June, 1981. I received a letter from W. L. Clark of Salinas, yesterday, (this Mr. Clark married Maggie Scott, a sister of Chas. H. Scott alas C. C. Scott, over twenty years ago, enclosed was a slip from a Portland paper, which B. G. Whitehouse, esq., of that city, kindly sent him.

On the 26th of November, 1963, I was married to Chas. H. Scott at my mother's home, (where I now reside,) by Rev. Mr. Haskell, a Unitarian clergman of our city, and now located in West Roxbury, Mass. Mr. Scott Man Syears of dage the following January; I was 20 years old the preceding month. The dage him 48 years old the first day of last January.

Our union was a happy one. On the 12th of April, 1871, a little bube, a son, was born unto us. Our happiness was complete, and up to April 11, 1879, continued to be so. This was the time he left us, ten years ago last month. The day following our son Harry was 8 years old. After he had been gone four days I received a long letter from him, telling me the cause of his leaving us.

last month. The day lollowing our son Marry was 8 years old. After he had been gone four days I received a Jong letter from him, telling me the cause of his leaving us. It was no domestic trouble. I have the letters now. He was on his way to Monterey, Cal. His sister and her husband, with their two children, and her mother, lived there. He stopped a week with them, and then went on to Porland, Or., in June, and not long after he went into the butcher business, and subsequently failed. We corresponded from April, 1879 till January, 1832. I was sending letters regularly to him up to January 6.1823, he doing the same by me till about 1831, then overything seemed wrong, so in September, 1881, my uncle Rev. M. G. Kimball, of Washington, wrote Rev. T. L. Elhot, of your city, for information, and Mr. Eliot made a thorough investigation at that time, and the positive proofs that I got from him, through my uncle, and which I have in my posvession, occasioned my seeking a divorce. You may know of the murder or neci-

maile a thorough investigation at that time, and the positive proofs that I got from him, through my uncie, and which I have in my possession, occasioned my seeking a divorce. You may know of the murder or accidental shooting of a Julia Clark, which occurred in his room where he was then tiving in the fall of 1831. It was at the corner of Morrison and Second streets, Mr. Eliot sent papers at the same time, which gave the account of the affair, theinquisition, Charles, C. Scott's testimony, etc., proved at that time that he was my husband, C. H. Scott (known as C. C. Beott there). In one of the affair, theinquisition, Charles, C. Scott's testimony, etc., proved at that time that he was my husband, C. H. Scott (known as C. C. Beott there). In one of the articles I have before me I quote: "The place is known as one of the villet, if not the very vilest, in town. A respectable new paper cannot venture to describe the vinious infanies combined in such a place, nor scarcely to hint at them." In a letter written by Mr. Eliot October 25, 1831, he says: "On calling at police headquarters I learned that Scott keeps, and has long kept, a mistress, that he was hartender for some time, but was discharged for over drinking." I think that Mr. Eliot, would be willing to give you may afformation concerning him at that time, should you wish it. When Mr. Scott went to Portland he requested me to address, all his mail to C. C. Scott, instead of C. H. as he did not want anyone this way to know of his whereabouls. I have a letter bearing the date of July 20, 1881, from Portland, in which he says: "Direct all letters to C. C. Scott as before, until you hear to the contrary." My brother's wite has two letters which he wrote in 1835, in which he alimided to his boy. He says: "You all know that love him." In this of him, and long to rechim." This is the last communication received from him directly by any of my family. All we have known of him since has come from his sister, Mrs. Silas Clark, of Raymondville, N. Y. He hos written her oc

Portland in November, 1879. I will enclose to it must have been a good likeness of time that time, as it looks as he did when to went way the previous April, only that he had lost some of his hair, as the picture shows. Anyone who knew him at that time must identify him from this picture. Mr. Eitot would, I feel sure, as he was acquainted with him then. He was slim then, but I hear he was viout, rather gross, of late years. You will confer a favor if you will return it to men iter you have no use for it. We understand there is property there. We understand there is property there. How much we do not know. We hear this Mrs. Scott in Portland macried him in 1881. It so, it was before I took any steps towards advorce, and she cannot be his legal wife. Whether she is or not, my son (now a fine young man of 18 years) is entitled to his share. As Mr. Huse has written you in regard to that, it is best for me not to interface. My object in writing at all is to state the case as it is, thinking it would be a help to you. Any information I can give you at my time will be cheerfully given." The above was, signed by Mrs. Huttle M.

The appended is ulleged to be an extract from a letter written at the instigation of Scott lo deceive. Mrs. Catherine Scott before he married her. Since the case went into court here charges have been preferred against Mrs. Scott that she was not his lawfully wedded wife, and that when she went through the form of a marriage exception.

min all the rest. A change I have long since been anxious to see you make. But in taking that step you must be careful that you love the young lady you accept as your partner for life, and that she also loves you, for without love there is no happiness. tied. Annie is married and will frounte you no more." \* \* \*

This letter has been in the possession of Mrs. Catherine Scott, so it is alleged, ever since her marriage, and does away with all imputations against her that she knew that her late huxband was a remarried man when he led her to the allar.

Those who knew Mr. Scott while he was one of the proprietors of the Gilman house would mever have believed that he was leading a double life. Heshowed the most genial disposition to the world; every one seemed his friend, and none would have dreamed that he was a married man when he wed the lady who now bears his mane.

Frank Jachetta appeared before Judge Steams that he was a married man when he wed the lady who now bears his mane.

TO EAST PORTLAND.

This magnificent property comprises 1400 lots and lies immediately between the city of East Portland (population 12,000) on the south and the city of Albina (population 4000) on the north, being really a "reserve" between two populous centers with a combined population of SIXTEEN THOUSAND. It is high, commanding a view of the entire cities of Portland, East Portland and albina and is reached by the street curs of the Willamette Bridge Railway Co. from either Portland or East Portland. This company is now operating two lines of street cars, one running north from Holladay's addition, through the heart of East Portland, across the Morrison street bridge, and the other running due west across the new steet bridge, both lines terminating in Portland. In addition to these two lines the cars of the Vancouver motor line run directly through Holladay's addition from north to south. The property can also be easily reached from the "west side" by either the Southern Pacific Railroad Company's steam ferry or by the small ferries running from Portland to Albina. Some of the finest residences on the "east side" are located in this addition. Many of the most prominent residents of Portland and East Portland are now purchasing properly in Holladay's addition and many elegant and substantial residences will be constructed there during the coming year. A magnificent Boulevard, Holladay avenue, 100 feet wide, cuts through the entire property from west to east, and is now one of the most popular drives out of the city. This connects with the new steel railroad and wagon bridge (spanning the Willamette) on the west, thus giving easy access into Portland from this most desirable property. Address or call on

ing built up by the judicious use of public money to subsidize and support steamer service between Frajand and hieroclonics and the world they ire to with Commerce has made fireat Fritain the richest of all nations and therefore the most powerful of sil. We look on st plucily and soe seed know how Emplish commerce is built. and soe sed know how English commerce is built up and grows atronger and makes English dicher, and do not have the ordinary wit to follow an example of sich weight and indinence it really seems as if the press of the nation was all agreed on this and urging such a course I is so simple and plain an example that we should not restitute to a some small portion of the ubiquitous surplus to put our commerce in similar position to claim the trade of the world.

King Milan of Servia has become a spiritualist and under the influence of a woman medium, who is supposed to be a medium of Russian in trigue as well as of occult forces, has resigned the cares and honors of state and become a private citizen He is absolutely subserviout to this woman—Mme Christoh—and lives a sort of dram life at her beck and command Ex King Milan has been a rather fast mortal. He has probably run through all the so-called phosaures of the sworld and now goes for the unknown and mediumlistic spheres that Mme. Christoff dwells in. When a man like Milan has run through this world sollies and has worn out such pleasures as fully lives on he is apt to go off with wild and uncertain things that appeals to the senses without posts asing actual good sense in themselves.

New York, Max 16.—The fight between the Dillon Strikin and Villard netters for the control of the Oregon Briway & Nevigation (ombar y continues very fierce. The transfer books of the company, close to-morrow and both parties were actively engaged in torrowing and buying stock. In the shock, exchange dealings in it absorbed all the interest. The greatest demand was for stock for delivery to-day. To being bid for such sit rest in stock deliverable to morrow and was freely so dat 85. In the loan crowd too, the stock was the main aftraction and 1 percent or \$100 for every 100 shares was bid for its use in it to-morrow. Neither side expressed in edge confidence in the result but the heavy, buying was apparently. Villards orders, while the opposition depended on legal met urse for their weapons. flames spread with great rapidity through
the wooden district, and the houses on
Vatier Chenicl, St. Peter and St. Marie
streets were burned. Help was asked from
this city, and Quebec engines were quickly
sent but owing to the lack of water their
force was crippled. Buttery B was
finally called out and rendered valuable
sessitance in fighting the flames. At 7
o clock the hre had destroyed over 100 build
ings. While the militia was preparing to blow
up houses to check the flames a premature
explosion took place killing Majorshort and
Seargent Wallaco of Battery B b, burying
them in the runs. At 9 o'clock the hodies
had not been recovered. The loss was \$150

QUEER May 16—The fire is still burning and no hopes are entertained of storping it until the open country is reached. Already 500 buildings mostly wooden telemonts have been burned. Over 10 000 people are rendered homeless. A greater portion camped in the fields with what few effects they were able to save while a few found sheller with friends in this city. Major Short's body was reco ered at noon. One leg and an arm had been toru from the body by the explicition at d were found some dis-

log and an arm had been torn from the body by the explosion ard were found some distance from the truth.

St. Shuy ur is a separate municipality from Quebe but separated from the city by only the width of a street. It has a population of 1 9 000. Only last night the st. Sauveur officials refused an office of this city to supply them with water. Quebec My 16—10 30 A. M.—The body of Sergeant Wallow has been recovered for ribly citing field. The fire has been checked on the city side but is still burning toward the northwest. It will probably stop only when nothing is left to feed it. The insurance is comparatively small. The larger number of house seastroyed are small wooden structures. A strong easterly wind is blowing Rain has been falling steadily for three hours.

The fire burnt itself out about 4 o'clock, after reaching the limit of the 5t Ganyer district. The north and west sides of Nashna and St Amboise streets have been swept clear with the exception of a portion of Valier street. About 700 houses were barned As many of them are temenants the number of families rendered houseless and large than 1300 accounts and the many large than 1300 accounts and the same large than

In argument for and against prohibition of the liquor traffic, statistics do not always carry the weight they appear to passess; land opposing statistics continually make completions the question of veracity. The truth of the matter is that figures do occasionally make merely a superficial showing. In the case of the abolition of the saloon in prohibition states, surface signs indicate, the total extinction of the liquor business; but beneath the surface there may be a currifur beneath the surface there may be a gurrling stream of the forbidden spirits, or the musical 'jug-jug' of the yielding by the generons "little brown" storage yeasel. On the other hand, where high license reduces the namen of salcons, the prohibitionist ears the drinking is done in those which remain, with no appearistic diminution.

The current number of the independent contains an artiel by R w. D. G. Minler, who makes prominent the fact of the signature by leading men of a certificate setting forth that during the eight years since prohibition was enacted in Kamsa, the population has greatly increased, business higher unit the open salcoh has disappeared. The signers are the governor, there expovernors, the chief justice, a number of judges and ex-judges of judicial districts, sheriffs, county siturous, and other county officials, the speaker of the lower house of the legislature, the department commander of the Grand Army of the Republic, mayors of chies, judices of the peace, and palace independently of the contrasting the effects of high license and prohibition, oldes the increase in Kanass despite the prohibition law, in the number of United States licenses issued in the states a show here of the first attement of tax stamps issued to Kanass 1 quor dealers under the law for the seven years indicated, the prohibition law having good into effect in 1882:

An Orgaonian reporter called at the wholesale drygoods house of Fleuchner, Mayer & Co of which the appointee is a member to ask if Mr. If sech would accept. He prefaced his question by announcing that Mr. Hirsch had been appointed minister to Turkey.

Minister to Turkey, 'ejaculated Mr Samuel Si mon. Has he been appointed I knew he had been mentioned for the place but had not heard the latest news.

'Do you think he will accept?

'Mr Hirsch is not in the city and no one has suthority to speak for him. He left here for Furopo December 24, having been called thither by the illness of Mr. Louis Fleischner the senior member of the firm. I have just received a letter from him. It is dated Frame, April 28. He says that in two or three days he would be in Viennuchen he would be able to tell which he would return home. He says that he is well.

The reporter taiked with a number of Mr. Hirsch is friends but none seemed to know whether he will take the office.
